TINA REQUIZA	ADMENISTRATION AND INTERNATIONAL BUSINESS	ADMENISTRATION AND INTERNATIONAL BUSINESS	UNIVERSIDAD ANTONIA MESTOR CAJERES VELAZQUEZ - JULIACA

ASSISTANCE TO COMMUNITIES IN THE ANDEAN HIGHLANDS OF SOUTHERN PERU.

Access to a college education for the children of Andean farmers and herders is a recent phenomenon in the Peruvian altiplano. The people in the Chijnaya network of villages place great value on education and have high aspirations for their sons and daughters. They make major sacrifices to support their children's goals, but with their low incomes and the problematic nature of farming in a challenging climate, families find it difficult to earn enough money to pay college expenses. The Chijnaya Scholarship Program provides the funds that allow young people from these communities to access higher education. A contribution of \$800 pays for a one-year university scholarship, and a contribution of \$500 will support one year of study at a technical institute.

scholarships. Currently funds are available to support only half of the applicants who meet the selection standards.

The Foundation's Scholarship Program has been in place for eleven years. From a modest beginning in 2007, the program has grown to encompass twenty-five communities in the Chijnaya network. In 2018, 53 scholarships were awarded to students from 22 different communities (33 women and 20 men). This is a highly competitive program that includes a rigorous application and review process. Students may use the scholarships for study at either a regional university or a technical institute. Since its inception, this program has granted over 400

Scholars choose a wide range of concentrations, including teaching, information technology, environmental engineering, business administration, nursing, accounting, civil engineering, biology, obstetrics, psychology, anthropology, public administration, medicine, law, and veterinary medicine. Student progress is carefully monitored, and continued support depends upon successful completion of each semester's courses.

Students who receive scholarships become part of the student scholars' organization, Musoq Riqchary (New Dawn), created by the students to carry out projects benefiting their home communities. New Dawn is also an important support and information resource for students who are usually the first in their families to attend a university or technical institute. It gives the students an opportunity to elect their own leaders, to practice self-government and to engage with their peers from other communities. Significantly, women have been elected to major leadership roles in New Dawn.

The Chijnaya scholarship program is a significant investment in the future of these communities and the region. The student scholars have already made contributions by addressing problems in their communities, using their newly acquired knowledge and skills. They have offered technical advice and addressed issues such as domestic violence and childhood anemia and malnutrition. Help us support these promising young people with a contribution to The Scholarship Program for Rural Youth.

WITH YOUR HELP, WE CAN CHANGE A FUTURE
